## Skills

• Azure | TailwindCSS | React | AWS | JavaScript | TypeScript | NextJS

- AWS | Google Cloud | Azure | Jira | CI/CD
- Microservices | Distributed Systems | Frontend | Backend | Full-Stack | English, Polish – *All professional proficiency or above*

**As a seasoned Full Stack Developer with a strong foundation in AI technologies, I blend front-end and back-end expertise with advanced knowledge of cloud architecture. My leadership experience enables me to guide teams effectively, ensuring that complex projects are executed seamlessly. Driven by innovation and a passion for all things tech, I am committed to delivering cutting-edge solutions that drive progress and efficiency.**

## Experience

### Senior Frontend Developer

[instillAI](#)

05/2024- 01/2025

- Built and maintained responsive front-end applications using Next.js, TypeScript, and Tailwind CSS, deployed seamlessly on Vercel to ensure optimal performance and scalability.
- Designed intuitive user interfaces with Figma, enhancing user experience and facilitating smooth interactions across web applications.
- Developed a fully-fledged AI assistant that retrieves and processes data from uploaded files, leveraging advanced machine learning techniques to provide accurate and actionable insights.
- Implemented the Artifact feature, enabling users to upload files, automatically chunk them, and efficiently retrieve relevant data, improving data management and accessibility.

### Full Stack Developer

[Workfinder](#)

03/2022 - 05/2024

- Developed a comprehensive job search platform using React and Django, improving user match accuracy with targeted opportunities.
- Integrated an intuitive user interface into products using Figma, JS, and Tailwind, enhancing interactivity and user satisfaction.
- Coordinated closely with the QA team to triage, prioritize, and address reported issues, resulting in a 20% decrease in the number of open issues.
- Worked alongside a team of 10+ engineers in an Agile environment using Jira for project management.
- Conducted regular code reviews using Git, contributing to improved code quality and efficient workflows.
- Leveraged AWS services such as EC2 and S3 for hosting, storage, and scaling the application, ensuring high availability and performance.

### Technical Client Manager

[hussl](#)

05/2022 - 10/2022

- Cultivated strong relationships with clients, including key stakeholders from Fortune 500 companies.
- Managed technical escalations and devised solutions using a variety of debugging and problem-solving tools.
- Providing technical guidance and support to clients in order to ensure successful implementation and use of company products and services.
- Led the development of several products E2E, from identifying system requirements and partner dependencies to workload balancing, software implementation, engineering, testing, and configuring metrics, alarms, monitors, and dashboards.
- Collaborating with internal teams to identify and resolve client issues, and managing client expectations regarding project timelines and deliverables.

### Web Developer

[leep](#)

01/2022 - 04/2022

- Developing and maintaining high-quality websites and web applications according to client specifications and industry standards.
- Collaborating with clients to identify their needs and providing suggestions and recommendations for the best technical solutions to meet those needs.
- Testing and debugging websites and web applications to ensure they are functional, responsive, and secure.
- Managing projects independently, including timelines, budgets, and client communications, to ensure successful delivery of projects.

### Full stack Developer

[Coltraco Ultrasonics](#)

04/2021 - 10/2021

- Developing and maintaining high-quality websites and web applications according to client specifications and industry standards.
- Ensuring the scalability, performance, and security of web applications and websites, and optimizing code for maximum efficiency.
- Testing and debugging websites and web applications to ensure they are functional, responsive, and secure.
- Improved SEP and user conversion, including Google Analytics, increasing UK revenue by *21% in the first quarter*.

## Education

---

**Master of Engineering**

King's College London

London

**09/2019 - 09/2023**

- **Master in Artificial Intelligence**
- Developed a custom LLM model for financial advice
- Won in-house AI hackathon with a team

## Interests

---

- Travelling (32 countries and counting)
- Boulderling
- Photography

## Projects

---

- **CODEFLOW**: AI-powered learning platform with quality content, integrated IDE, and GitHub integration for a streamlined coding education experience. **(04/2023)**
- **DOCKER EXPLORER**: A Docker command collection with options and descriptions to aid users in managing containers and images. **(03/2023)**
- **JUSTTALK** - Online platform for learning languages **(11/2023)**

## Certifications

---

- **Aws Certified Developer – Associate**: Validates the skills of developers in designing, deploying, and maintaining applications on the AWS platform **(04/2023)**
- **Adobe Certified Professional in Visual Design** **(12/2022)**
- **Google Cloud Big Data and Machine Learning** **(03/2022)**

## Others

---

- **Idea Factory**: Finalist of the 2023 Edition of KCL Idea Factory with Codeflow **(03/2023)**
- **Final Year Project Award**: Best Final Year Project **(06/2022)**
